Accelebrate®

ACCELERATED LEARNING, CELEBRATED RESULTS®

HANDS-ON, LIVE TECHNICAL TRAINING

Don't settle for a "one-size fits all" course!

Have Accelebrate deliver exactly the training your team needs at your site or online.

Our **hands-on workshops** are **led by expert practitioners** with years of teaching AND field experience. Our trainers span the globe and are at the top of their professions as:

- senior developers
- experienced data scientists
- seasoned managers and CTOs
- skilled communicators
- renowned researchers
- published authors
- conference speakers

Tailor Your Training

After an initial discussion with your learning advisor, we'll set up call with an instructor to discuss your team's experience and goals. We can also assess and survey your learners to identify skill gaps and pain points. Based on this, one or more tailored classes will be proposed for your consideration.

Flex the Schedule

Accelebrate's classes can be split into segments of just a few hours each and delivered around your team's schedule. We can even blend real-time, in-class learning with at-your own pace project work outside of class hours.

Contact us today for a customized proposal.

DATA SCIENCE, AI/ML & RPA

Python and R are the two most popular open source programming languages for data analysis, machine learning, deep learning, artificial intelligence, and natural language processing. Python is a multipurpose programming language with superb data science capabilities, whereas R is a specialized language for data analysis applications. Classes for either can be tailored to incorporate your data. In addition, we offer training on Julia and MATLAB, both used for machine learning, data analytics, and data visualization.

Robotic Process Automation (RPA) tools leverage machine learning and artificial intelligence to analyze current business processes and facilitate their end-to-end automation. We teach Blue Prism and UiPath, two of the most popular RPA platforms.

DATA SCIENCE PROGRAMMING
- Azure Data Science
- Julia
- MATLAB
- Python Programming
- R
- Machine Learning

ROBOTIC PROCESS AUTOMATION
- Blue Prism
- UiPath
- Splunk

DATA ANALYTICS TOOLS
- Alteryx
- NVivo
- RapidMiner

Visit **www.accelebrate.com/data-science-ai-ml-rpa-training** for a complete list of courses.

Have you considered a data science bootcamp?

Pick your **fundamental programming language**, your **data visualization tool**, and your **cloud preference**. We will tailor the classes and the schedule to meet your team's needs.

See page 12 for more details or visit www.accelebrate.com/upskilling.

DATA VISUALIZATION & REPORTING

All organizations today generate enormous volumes of data. Searching, depicting, and reporting on the data are keys to your organization's successful decision making and longevity.

Learn how to show solutions to business challenges and present data more effectively with the leading business intelligence and data visualization tools. Our data visualization training courses teach you how to create attractive and interactive reports, charts, graphs, and dashboards to illustrate relationships among even the most complex data. Classes can be tailored to incorporate your data.

BusinessObjects
Crystal Reports
SSRS

DATA VISUALIZATION
Power BI
Tableau
ELK Stack

Visit **www.accelebrate.com/data-visualization-reporting-training** for a complete list of courses.

Did you know we offer open enrollment training?

We offer many open enrollment classes in a variety of topics including:

- **Blue Prism**
- **BusinesObjects**
- **PostgreSQL**
- **IT Leadership**

DATABASES & BIG DATA

Big data refers to sets of data so large that traditional data stores and analytical tools are inadequate for handling them. In recent years, the number of these ultra-large data sets have grown exponentially, flooded with data from the Internet, social media, sensors, and a wide array of other sources. What organizations do with these big datasets is vital to their growth, as fast decisions and strategic business choices depend on the data being analyzed properly and efficiently.

IBM
MongoDB
MySQL
PostgreSQL

SQL SERVER
- SQL Server
- SSRS
- SSAS
- SSIS
- Business Intelligence
- Microsoft SQL Server Certification
- Transact-SQL

ORACLE
- Oracle Application Express
- Oracle Database

BIG DATA
- Actian Matrix Architecture & SQL
- Apache Spark
- Big Data Infrastructure
- Google BigQuery SQL
- Greenplum Architecture & SQL
- Cassandra
- Kognitio Architecture & SQL
- Snowflake SQL
- Teradata
- Vertica Architecture & SQL

AGILE & IT LEADERSHIP

Agile is a set of related practices focused on completing projects iteratively and incrementally. First pioneered in the world of software development, Agile methodologies are now used throughout organizations.

Accelebrate's Agile training teaches your software developers, product owners, executive leadership, marketers, and others the practices of Agile and Scrum and how to integrate those methodologies into daily project management.

Accelebrate's IT leadership training classes and seminars teach attendees how to motivate their IT teams through team building, clearer communication, effective leadership techniques, broadened management perspectives, successful conflict resolution processes, and more.

Did you know we offer communication training?

- **Writing and Communication**
- **Remote Conferencing Tools** including Zoom, WebEx, Microsoft Teams, Adobe Connect, GoToTraining, and Skype

AWS, AZURE & CLOUD COMPUTING

Amazon Web Services (AWS) is Amazon's popular constellation of cloud-based services for organizations and individuals.

Azure is a Microsoft cloud computing and infrastructure platform that allows the construction, deployment, and management of applications and services in Microsoft's data centers (and those of its partners). Azure offers pre-built templates and managed services to make it easier to quickly build and manage enterprise, mobile, and web applications.

Google has a long track record of building software at "Web-scale" and invented many of the technologies used in modern software systems.

Amazon Web Services (AWS)	OpenStack
Azure	Terraform
Google Cloud Platform

Did you know we offer FREE videos, tutorials, and a blog?

Check out these AWS resources:

- **AWS For Mobile Developers** webinar - how to create a strong backend in AWS so you can then focus on app development.
- **5-minute AWS tips** on our YouTube Channel.
- **AWS Tutorial** on adding an AWS User Authentication to a Mobile App.

OUR VALUES

At Accelebrate, we are...

Respectful

- Accelebrate respects our clients' training needs and carefully adapts classes to meet them.
- We listen carefully to the true needs of our clients and make recommendations in their best interests.
- We treat all people (clients, employees, and business partners) with respect, regardless of differences.
- Our respect for others makes us receptive to feedback and ensures we continuously improve.
- In interactions with clients, instructors, and each other, we convey our concern and interest in the other person.

Rigorous

- We strive to be the best training firm our clients hire in terms of instructional quality, flexibility, ease of logistics, attention to detail, and timeliness of communication.
- We strive to be the best training firm for which our instructors work while simultaneously holding them to high standards for how they teach and treat our clients and staff.

Responsive

- We feel a sense of urgency on any matters related to our clients.
- We own problems, resolve them in a timely manner, and make commitments with care.

OUR PROCESS

By designing and executing a **holistic training strategy**, you ensure that you are positioned to attract and retain top talent while increasing your organization's readiness to pursue new opportunities.

In Accelebrate's process, we:

- **Listen carefully** to your team's prior experience and goals, and (optionally) conduct surveys and assessments to pinpoint skill gaps and pain points.
- **Design a time- and cost-efficient training program** that closes these gaps and addresses your learners' real-world challenges and upcoming projects.
- **Review learner feedback** and (optionally) conduct learner assessments to confirm your students' satisfaction and skills gain.

Our learning programs are designed to align with your organization's strategic goals.

Starting with a skills gap analysis, we will work together to gain an understanding of your workforce's current capabilities and analyze the top skills needed to propel your organization forward.

Our plan will include options for multiple delivery modes, custom content development as needed, and progress assessments.

After each training, we review the program feedback with you and discuss enhancements for future learning.

UPSKILLING/RESKILLING

Each bootcamp is a journey, tailored to your team's goals and schedule, leading you to success with the technologies you need to master.

STEP 1: Training Needs Assessment

- Meet (in-person or online) with all stakeholders to pinpoint goals and understand the technologies you want your team to learn.
- Explore which learning formats and schedule would work best for your team, e.g., online, in-person, on-demand, or a combination.
- Discuss incorporation of capstone labs and real-world projects to reinforce new skills.

STEP 2: Program Design

- Review the proposed training flow/map, course outlines, timeline, and learning objectives, then refine them based on your feedback.

STEP 3: Ongoing Training Delivery and Assessment

- Deliver a phase of the training program.
- Evaluate training success after each phase and make necessary adjustments to the remaining phases.
- Apply new skills before building on them with the next phase of training.

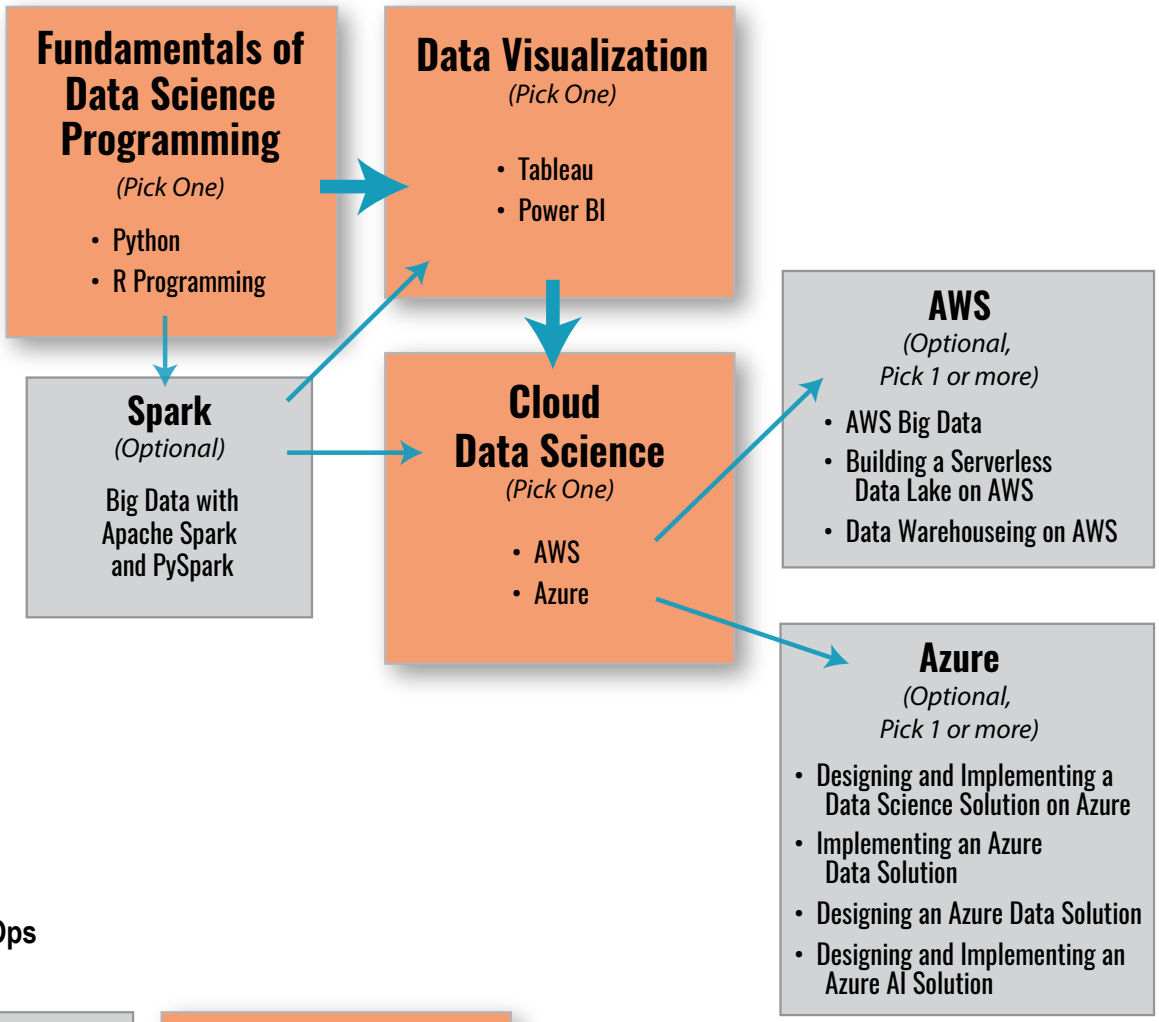
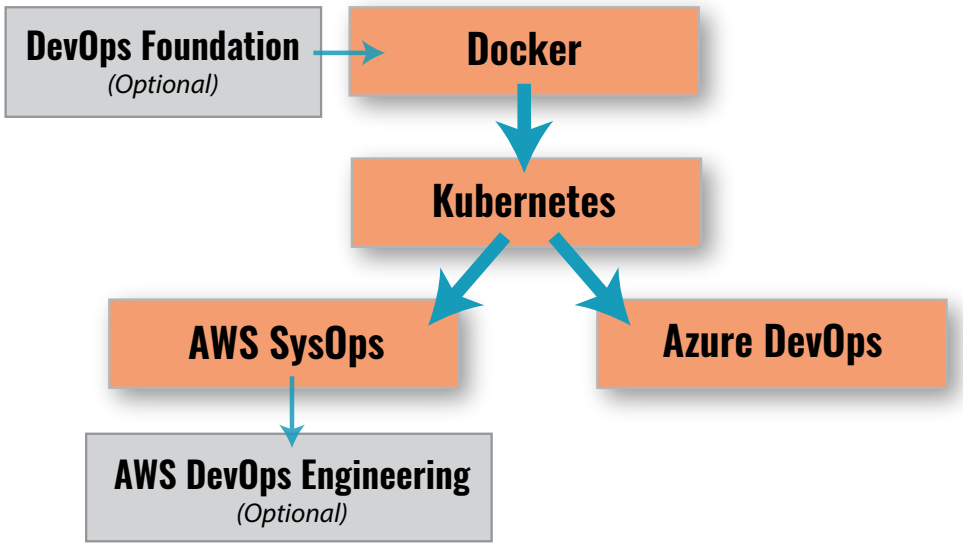
Data Science



Cloud and DevOps



SOFTWARE DEVELOPMENT

Learn the latest programming languages, architectural practices, and testing techniques with Accelebrate! We teach how to write performant applications in the newest languages (like Go and Rust) and long-time favorites (like C#, Python, and Java) using recognized best practices and test-driven techniques. Have an older code base that you're ready to refactor? We can teach your team design patterns and unit testing techniques to ensure your applications are scalable and reliable.

MICROSOFT & .NET

As a **Microsoft Partner,** Accelebrate has taught and developed with Microsoft technologies since our firm's inception. We teach the latest .NET development techniques, as well as development and administration skills for Azure, SQL Server, SharePoint, Dynamics, Exchange, Microsoft 365, and all other Microsoft platforms. Whether you are a developer building a responsive .NET 5 application, a cloud specialist scaling your organization's data solutions in Azure, or a business leader implementing best-of-breed communication and document management using Microsoft 365, we have the right training for you and your team.

DEVOPS & CI/CD

DevOps ("development + operations") is the collaboration of software developers and other IT staff to build, test, and release software efficiently. Accelebrate's DevOps training courses teach all the skills necessary to stand up and tear down complex local, cloud, and hybrid environments and applications using configuration management automation tools such as Ansible and Chef, containerization platforms and orchestrators such a Docker and Kubernetes, and more.

Continuous Integration/Continuous Delivery (CI/CD) is the practice of continually merging code from multiple developers and releasing the resulting software with greater frequency and speed. CI/CD training on pipeline tools such as Jenkins, CircleCI, Git, and Maven can help your team produce better software more quickly.

- Ansible
- Apache Maven
- Chef Infra Fundamentals
- Docker & Kubernetes
- DevOps CI/CD Pipeline
- DevOps Institute Certification
- ELK Stack
- Git
- Gradle Build System
- Jenkins
- Jira & Confluence
- Linux
- Microservices

Keep Your Training Budget from Going to Waste

And get additional free training with Accelebrate's 2-Year Training Voucher program

Are you concerned about losing your unused training budget at the end of your fiscal year? Would you like to make an investment in private training for your teams that can be scheduled over 2 years and save your organization money in the process? If so, Accelebrate's 2-Year Training Vouchers are here to help.

Here's how it works:

1. Purchase and prepay for private training via check, ACH/EFT, or wire. You'll receive a value bonus on your voucher purchase as follows (all amounts are in US dollars):
   a. Less than $50,000: no bonus
   b. $50,000-$99,999: 7.5% bonus *(e.g., $60,000 purchase results in $64,500 in vouchers)*
   c. $100,000-$249,000: 10.0% bonus *(e.g., $120,000 purchase results in $132,000 in vouchers)*
   d. $250,001+: 12.5% bonus *(e.g., $300,000 purchase results in $337,500 in vouchers)*

2. Receive your vouchers, which are redeemable for private training classes (online or at your site) starting within two years from the purchase date.

3. Request quotes as your training needs arise.

4. Lock in your training dates and redeem your vouchers to pay for your team's training.

Interested? Please contact your account representative for further details, email us at **sales@accelebrate.com**, or call us at **877 849 1850** (or +1 678 648 3113), **option 1**.
